Valve Size	B1V(Straight,Angle,3Way) B2V(Angle,3Way) B3V,B4V(Straight)	B2V (Straight)	B3V,B4V (Angle,3Way)	B1SV(Straight,Angle,3Way) B2SV(Angle,3Way)	B2SV (Straight)
Seat Material	PTFE [50°F(10°C) to 150°F(65°C)]			PFA [-65°F(-54°C) to 300°F(149°C)]	
Temperature °F(°C)	Working Pressure psig (bar)				
-65(-54) to 50(10)	-	-	-	2500 (172)	3000 (206)
50(10) to 150(65)	2500 (172)	3000 (206)	1500 (103)	2500 (172)	3000 (206)

To determine kPa, multiply psig by 6.89 and bar by 0.0689  
 When valves with Hy-Lok Fitting end connections are connected to tubing, the working pressure of tubing must be the considered in the caculation of total system working pressure

## Testing

- Each valve is tested with nitrogen @ 1000 psig (69bar) to max. leak rate of 0.1SCCM.
- Optional tests are available upon request.

## Packing Adjustment

- Valves are factory adjusted for 1000psig service at 70°F (21°C).
- For services at higher pressure, the packing must be readjusted. This can be done with the valve in-line. Untighten the hex key to remove the handle. Tighten the packing bolt clockwise with the increment of a **quarter of a quarter** turn (22.5°) until leaktight seal is obtained. And then reassemble.
- Exposure of valves to varying temperature can affect the initial packing load. You may need check leak and readjust packing bolt.

## For 3-way (Switching Valves)

### ⚠ Attention

- 1) Check the flow direction
- 2) Do not use quarter turn the handle for block (Only guarantee the 180° turn the handle)

## Handle

- Standard : Black Nylon handle
- Optional : Blue, Green, Red, Yellow Nylon handle  
Aluminum bar handle

## Sour Gas Service

- This service is provided to meet NACE Standard MR-0175 & MR-0103.

## Cleaning and Packaging

- All metering valves are cleaned and packaged in accordance with Hy-Lok standard cleaning and packaging.
- A special cleaning and packaging are available as an option.

## SAFETY in VALVE SELECTION

Proper installation, materials compatibility, operation and maintenance of these valves are the responsibility of the user. The total system design must be taken into consideration to ensure optimal performance and safety.

## Use of Non-Standard Products

For non-standard not shown in dimension table, it can be used by assembling Hy-Lok tube fittings to standard products. This use of way is easily available to the construction of system, especially it is more reasonable in aspects of delivery and purchasing costs. For the more information and types of connector, please refer to the Hy-Lok Tube Fitting Catalog.

### Example of Connection

**Note** :This figure is only for reference, please refer to Hy-Lok tube fittings catalog for varios connection.
